

A Journey Through Korea's Transformation

The Global Knowledge Exchange and Development Center (GKEDC) was officially launched in 2018 by the Ministry of Economy and Finance (MOEF) and Korea Development Institute (KDI). The Center is a knowledge hub offering exhibitions, learning programs, and knowledge contents based on the development experience of Korea and other countries.

The International Learning and Program Team at GKEDC offers various educational programs targeting international students residing in Korea. The programs offer stories of Korea's economic development through the exhibitions which capture pivotal moments in Korea's modern history in economic, social, and cultural contexts. Also, it includes activities aimed to stimulate mutual exchange of country cases among participants.

The Republic of Korea has made one of the most dramatic transformations in a short time period. The Country has transitioned from a resource-poor, low-income nation to one of the most technologically advanced nations in the world. This miraculous journey has been accompanied by challenges and hardships. Our programs will not only give you a chance to witness Korea's experiences but also to link with the global development agenda.

General Program: Korea's Economic Development

A. Overview

- ◆ You can select either a half-day or a full-day course.
 - Half-day course (3 hours) 10:00-13:00 or 14:00-17:00
